PRAGADEESWARAN G

Python Developer | Backend & API Development

Tiruchirappalli, Tamil Nadu | +91 8220481397 | pragadeeswaran611@gmail.com

LinkedIn | GitHub | Portfolio

PROFILE SUMMARY

Computer Science Engineering graduate with hands-on experience in Python backend development using FastAPI, Flask, and PostgreSQL. Skilled in REST APIs, database operations, authentication, and CRUD functionality. Developed a Leave Management System and a GitHub Repository Analyzer. Seeking an entry-level Python Backend Developer role where I can contribute to practical software solutions.

INTERNSHIP EXPERIENCE

VDart Software Pvt. Ltd – Software Developer Intern

Trichy, Tamil Nadu | Jul 2025

- **Gained hands-on experience in the Software Development Life Cycle (SDLC)** by transitioning theoretical Computer Science concepts into real-world software practices in an Agile environment
- **Enhanced professional communication and team collaboration skills** through daily standups, progress updates, and technical reporting to HR and senior development leads
- **Developed the core application backend using Python and Flask**, applying MVC architecture principles for structured and readable code organization.

PROJECTS

GitHub Repository Analyzer

Tech Stack: Python | FastAPI | PostgreSQL | Git | GitHub API

- Developed a Python and FastAPI application to analyze GitHub repositories and identify technology stacks and repository health indicators.
- Built modular detection services to identify frameworks, databases, authentication methods, and CI/CD configurations.
- Implemented rule-based health scoring, confidence scores, and repository recommendations using Python.
- Integrated GitHub API and repository-cloning workflows, with REST endpoints documented through Swagger UI.

Leave Management System

Tech Stack: Python | Flask | Jinja2 | Bootstrap 5

- Developed a web application for employees to submit leave requests and managers to approve or reject them.
- Implemented user authentication, session management, password hashing, and role-based access control.
- Designed PostgreSQL database tables and integrated CRUD operations using psycopg2.
- Connected backend functionality with Jinja2 templates and Bootstrap 5 for leave tracking and approval workflows.

TECHNICAL SKILLS

Programming Languages: Python, SQL

Backend Development: FastAPI, Flask, REST APIs, JSON

Databases: PostgreSQL, Relational Database Design

API & Developer Tools: Git, GitHub, Postman, Swagger UI, Docker

Core Concepts: OOP, CRUD Operations, Authentication, Role-Based Access Control (RBAC)

Development Practices: SDLC, Agile Methodology, Debugging, Unit Testing

EDUCATION

Bachelor of Engineering in Computer Science and Engineering

CARE College of Engineering, Trichy | **2022 – 2026**

CGPA: 8.14/10

CERTIFICATIONS

Python for Data Science — IBM

Software Engineer — Hacker Rank

Career Essentials in Generative AI — Microsoft
