PROFILE SUMMARY

Computer Science Engineering student with hands-on experience in Python backend development, REST API development, database-driven applications, and AI-powered solutions. Experienced in building applications using Python, FastAPI, PostgreSQL, Git, and LLM APIs through internship and academic projects. Strong foundation in object-oriented programming, database design, SDLC, and software development practices, with a focus on building reliable and scalable software solutions.

INTERNSHIP EXPERIENCE

VDart Software Pvt. Ltd. **Jul 2025**
Software Developer Intern | Trichy, Tamil Nadu

- Developed a role-based **Leave Management System** as part of a collaborative software development team.
- Participated in the **Software Development Life Cycle (SDLC)** including requirements analysis, design, development, testing, and deployment activities.
- Developed backend and frontend modules using **Python, Flask, PostgreSQL, HTML, CSS, and Bootstrap**.
- Implemented user authentication, role-based access control (RBAC), CRUD operations, and database integration**.**
- Designed and integrated relational database operations using **PostgreSQL and SQL** for leave tracking and management.
- Collaborated with software engineers in an **Agile development environment**, participating in code reviews and following development best practices.

Technologies: Python | Flask | PostgreSQL | HTML | CSS | Bootstrap | SQL | Git

PROJECTS

AI Software Engineer Assistant
Tech Stack: Python | FastAPI | PostgreSQL | OpenAI API | Git | GitHub API

- Developing an AI-powered backend application that analyzes **GitHub repositories** and generates structured software engineering reports.
- Building **REST APIs using FastAPI** to process repository metadata and support AI-driven analysis workflows.
- Integrating **GitHub API and OpenAI API** to retrieve repository information and generate AI-based software engineering insights.
- Designing a modular backend architecture with **PostgreSQL** for project data management and future feature scalability.
- Using **LLM integration and prompt engineering** to generate repository insights, architecture summaries, and software engineering recommendations.

Source Code: github.com/GPragadeeswaran/AI-Software-Engineer-Assistant**.**

Leave Management System
Tech Stack: Python | Flask | PostgreSQL | HTML | CSS | Bootstrap | Git

- Developed a role-based **Leave Management System** to manage employee leave requests and approval workflows.
- Implemented **authentication, role-based access control, and CRUD operations** using Flask and PostgreSQL.
- Designed a **normalized relational database** for efficient leave tracking and management.
- Integrated backend services with the database to support leave request and approval workflows.
- Built responsive frontend interfaces using **HTML, CSS, and Bootstrap**.

Source Code: github.com/GPragadeeswaran/leave-management-system.

TECHNICAL SKILLS

Programming Languages: Python, SQL

Backend Development: FastAPI, Flask, REST APIs

Frontend Development: HTML5, CSS3, Bootstrap

Databases: PostgreSQL

AI Technologies: OpenAI API, LLM Integration, Prompt Engineering

Developer Tools: Git, GitHub, VS Code

Software Engineering: Object-Oriented Programming (OOP), CRUD Operations, Database Design, SDLC

CERTIFICATIONS

Python for Data Science - IBM
Software Engineer Intern - Hacker Rank
Career Essentials in Generative AI – Microsoft

EDUCATION

Bachelor of Engineering in Computer Science and Engineering 2022 – 2026
CARE College of Engineering, Trichy
CGPA: 8.14/10
